

# Are you our next No Such Intern?

No Such Ventures is seeking a motivated, down-to-earth and original Intern to join its Investment Team and disrupt the VC industry.

No Such Ventures

# No Such Intern

Learn a ton about high-growth companies and about investing in them. Get maximum exposure to entrepreneurs and their business models.

Help us become the VC that we want to be, by:

- Attending meetings with prospective portfolio companies and community events;
- Analyzing investment opportunities by talking to relevant experts and performing desk research (e.g. compiling competitor reviews, market data, product demos, etc.);
- Helping the rest of the team with projects related to our portfolio companies;
- Helping us improve our own operations and processes;
- Performing a deep-dive into certain technology areas and markets;
- Voicing your opinion, as ideas matter; titles or positions do not.

You have:

- A will to win;
- An opinion, yet you are coachable;
- Friends, which call you a team player. The same friends, that you'll ask for a favor when analyzing the very market they're specialized in;
- The ability to listen effectively and to analyze people;
- No love lost to analyzing some numbers;
- An unpretentious and fun attitude;
- An entrepreneurial mindset and eagerness to work in the VC industry.

And:

- A Bachelor's or Master's degree;
- Relevant experience through previous internship(s) (e.g. venture capital, private equity, M&A, entrepreneurship, consulting, transaction services); and
- Fluency in English.

You get:

- Exposure and experience working in a VC, which also is a startup (double whammy);

- A competitive and enjoyable working environment with fun and high-performing colleagues;
- A chance to work with exceptional entrepreneurs;
- The opportunity to board our pirate ship and help us find the treasure island ;)

**Role:** No Such Intern  
**Start:** Flexible  
**Location:** Amsterdam (on-site)  
**Duration:** 5-6 months  
**Salary:** Market standard internship allowance

No Such Ventures is a European investment firm focused on growth ~~stage~~ companies, currently investing tickets of € 2m to € 8m.

We love startups and scaleups. Successful ones are run by ambitious entrepreneurs, not afraid of what others think, creating their own pathways. That's what we like to do as well. So, what better way than to work with and partner up with such types of companies? Trying to be the worthwhile venture capitalist to them.

Individually, everyone brings something to the table, through different experiences and viewpoints. Collectively, we are a focused, collegiate team, with the will to win, while prioritizing fun at the same time.

Applications to be sent to:

Please include your CV and motivation, feel free to surprise us!

# Connecting people to grow together

in dedicated missions and unconventional ideas.

Sometimes get the feeling that most investment firms look alike?

Same inflexible fund structure, standard way of communicating and "spray and pray" tactics?

We do. Constantly.

This is why we think investing should be done differently:

- Investing through a flexible deal-by-deal structure, instead of a rigid, old-school fund.
- Investing with the money of active investors, who can truly help, instead of with money from passive, asset management investors.
- An entrepreneurial approach towards investing, not believing in fund criteria, allowing us to freely invest with regards to type of shares, without min. or max. % of shares, nor a particular sector or geography. Great companies and investments don't fall into a predetermined, one-size-fits-all bucket.
- Making concentrated bets, instead of using the "spray and pray" approach, which results in a lower investments / No Such Ventures team members ratio and more value add towards the companies.

As we're trying to redefine venture capital, we need people onboard that are curious and don't think in terms of limits.

So, you can find us:

- Constantly thinking of and trying to adapt ourselves to be(come) the ideal VC experience.
- Prioritizing unique dealflow, accessed not only through our own personal networks and industry knowledge, but also through the networks of our own active investors of entrepreneurs and experts, which are well and truly part of No Such Ventures.
- Investing on a highly selective basis, as we believe that everything which benefits from attention, grows. Therefore, we have set up a framework to support strong company growth, while also having the network to help with business introductions, finding recruitment candidates, locating befriended domain experts to help, etc.
- Operating based on these values:
  - We act upon first principles, never 'just' follow the herd
  - Fast is better than slow
  - We love transparency, not wasting each other's precious time

We aim to invest €2m to € 8m in ambitious companies, to which we are the right partner, as we're no bag of anonymous money.

Our active investments include StrateX, Trustoo, Rodeo, E.A.Z. Wind, Exasun, Goboony, blackbear, Contentoo in The Netherlands, Vendora and Bryq in Greece, and Vromo in Ireland. Our first investment in 24i has been successfully exited, creating a strong foundation to build on.

StrateX is a workforce management consultancy and software provider that predicts, matches, plans, and reports workforce capacity and demand

Trustoo is a marketplace that connects clients looking for all kinds of professional services to service providers in their local area

Vromo builds delivery optimization software which enables restaurants to perform delivery in a more cost-effective way

Rodeo develops project management software with a distinctive UI and UX design for the creative industry

Vendora has developed a horizontal classifieds marketplace in Greece that connects buyers and sellers in a seamless way

Exasun innovatively merges a roof tile and solar panel into one, turning houses more energy efficient in an aesthetically pleasing way

E.A.Z. builds 15-meter-tall windmills that excel in terms of reliability, cost, and performance, to help farmers become less dependent on the grid

Goboony is a peer-to-peer motorhome rental marketplace with the most complete and user-friendly offering, active in six European countries

blackbear is a software-enabled marketplace that matches "solvers" to companies to help them solve their (short-term and paid) assignments

Bryq's talent management platform allows companies to cut down on time to hire, diversify their teams, and grow their organizational culture

Contentoo's software-enabled platform matches the world's best specialized freelance content creators to top tier businesses in a hassle-free way

Propel is building the Infrastructure layer for tech talent communities to grow/scale and serve their members better
